what we do for you:

Safety for Life have been providing OHS Services to the Contractors and Licensees of Australia Post and related entities since 2015.

From the initial assessment of contract requirements along with consultation with stakeholders, the Work Health and Safety Manual was developed.

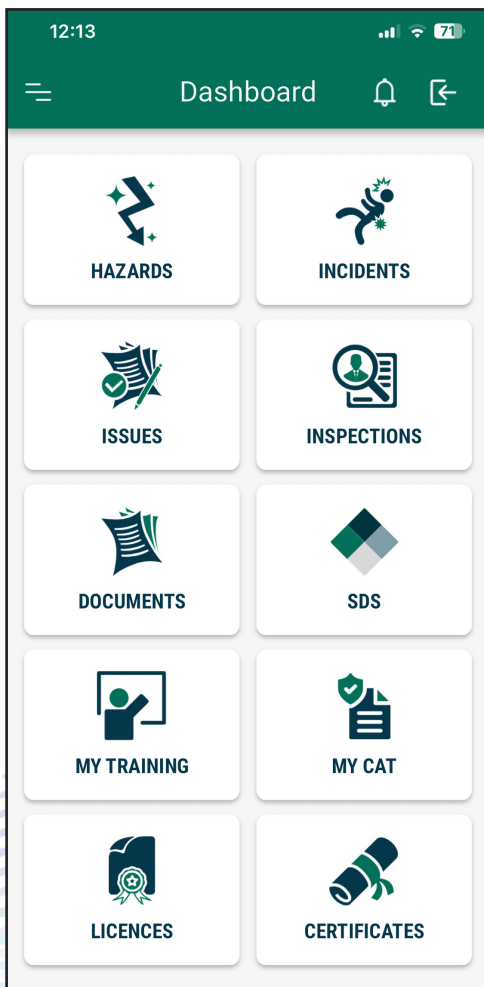

Now... we bring you MailPACS, the "mail postal and compliance safety software".

MailPACS is powered by Sherm Software, a web-based application accessible also through a mobile app that is free to download from both Google Play and iTunes.

Our Vision is to support your safety performance and compliance requirements through our Managed Service Program.

how it works

Our current postal contractors and licensees have the option to transition over to MailPACS software solutions by simply going to www.MailPACS.com.au website and clicking on the Order Now action button. Upon receiving your order an invoice will be generated. When payment is received you will be contacted by our MailPACS Administrator who will get everything set up for you and provide instructions and schedule an online information session.

If you are new to our services, no problem!

The same process is followed and you will enjoy a simple transition into the MailPACS postal compliance solution.

not ready yet?

If you are not ready to transition from the hard copy WHS Manual to MailPACS software managed service, our commitment to you remains the same.
